When the new system is live, it will allow Chambers to log in and accept the work directly from the website simply by using the username and password. All of your chambers information will be pre-registered and communicated to the solicitors automatically.

The system will allow you to select and allocate Counsel who are entered onto the system. Please provide details of the junior Counsel or Pupils that you wish to enter onto the system at the outset. You will be able to call us and add a Barrister at any time in the future so it would be best to only register a couple of Barristers to start with.
